

# A FIXED INCOME ALTERNATIVE

Given the current low interest rate environment, conservative investors must tread carefully in bond markets. When interest rates rise, bond prices generally go down, which may lead to negative returns.

Canada 10Yr Bond	8.87	1.68%	-2.76%

## Is there a fixed income alternative for conservative clients?

Yes. An alternative is to diversify by investing part of their portfolio in equities. Holding equities in tandem with fixed income can reduce risk while enhancing potential returns. Over the last 5 years, an 80% fixed income and 20% equity portfolio\* has generated higher returns with lower risk than a 100% fixed income portfolio.

## Emblem Diversified Income Portfolio: A fixed income alternative

With a target investment mix of 80% fixed income and 20% equities, the Empire Life Emblem Diversified Income Portfolio may be appropriate as an alternative to a 100% fixed income portfolio.

### Managing risk while generating income

To generate income and help protect investors from potentially rising interest rates, the Portfolio uses a “core plus” fixed income strategy.

#### Core

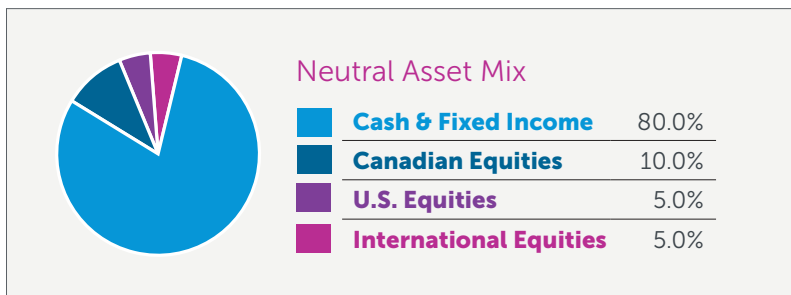

At the core of the fixed income component are high quality, investment grade bonds.

#### Plus

The added plus is a smaller – up to 20% – allocation to high yield bonds, mortgages and hybrid income producing securities like preferred shares. The plus portion of the fund may also invest in real return bonds, floating rate notes, certificates of deposit, ETFs, futures, options and swaps.

#### Result

The result of this strategy is a potential boost to yield without taking on a lot of additional risk.

### Benefits to your clients

#### Predictable Income

- 4% annual distribution, paid monthly

#### Concentrated Portfolio

#### Transparent

#### Tactical Asset Management
